ABOUT

Java Full Stack Developer with hands-on experience in developing web applications using Java, Spring Boot, ReactJS, REST APIs, and SQL. Skilled in building backend services, integrating RESTful APIs, implementing authentication and authorization, and developing responsive frontend interfaces. Strong foundation in Core Java, OOP, Data Structures and Algorithms, DBMS, and SQL, with experience working with MySQL and MongoDB.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Machine Learning

Thakur College of Engineering and Technology, Mumbai

2021-2025

CGPA: 9.1/10.0

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, SQL, Python, Django
- **Frontend:** ReactJS, HTML5, CSS3
- **Backend:** Spring Boot, Spring MVC, REST APIs, Node.js, Express.js
- **Java Technologies:** JPA, Hibernate, Spring Security, JWT
- **AI/ML:** Python, Machine Learning Fundamentals, Generative AI Concepts
- **Databases:** MySQL, MongoDB
- **Core Concepts:** OOP, Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks
- **Tools:** Git, GitHub, Postman, Maven, IntelliJ IDEA, VS Code

WORK EXPERIENCE

Software Engineer – Capgemini [↗](#)

July 2025 – August 2026

Arek Oy

- Worked in **Java and Spring Boot microservices** supporting Finland's statutory pension domain, processing employment, earnings, insurance, and pension related information.
- Implemented unit and integration tests using **JUnit, Mockito, and Spring Boot Test** for critical pension processing and data validation workflows.
- Integrated authentication and authorization with backend APIs and responsive ReactJS interfaces.
- Built data access layers using **Spring Data JPA and Hibernate**, working with relational databases to persist and retrieve employment, earnings, insurance, and pension records.

PROJECTS

Railway Reservation System [↗](#)

Java — Spring Boot — MySQL — ReactJS

- Built a full-stack railway reservation system using **Spring Boot, ReactJS, and MySQL** to manage users, trains, bookings, and payments.
- Designed a **microservices architecture** with separate services for user, train, reservation, and payment management.
- Developed **RESTful APIs** and integrated them with the ReactJS frontend for train search, ticket booking, and cancellation.
- Integrated **Stripe payment gateway** and deployed the application using **Docker and Render**.

EduTechHub – Online Learning Platform [↗](#)

JavaScript — ReactJS — Node.js — MongoDB

- Built a full-stack e-learning platform using ReactJS, Node.js, Express.js, and MongoDB with secure authentication.
- Added JWT-based authentication and role-based access control for students and instructors.
- Created instructor dashboards, course progress tracking, and course search features to improve user experience.

ACHIEVEMENTS

- Built and leading a [tech community](#) helping developers grow together through open source guidance, hackathons, tech talks, podcasts, and meetups; fostering active learning via Discord and collaborative projects
- AWS Certified Cloud Practitioner: [Certificate Link](#)
- Certified in Java Full Stack Development: [Certificate Link](#)
- Consistently Upgrading Technical Skills through Hands-on Learning and Practice.
